

Technicians - Mining, Mechanical & Electrical

Ashton Coal Operations Pty Ltd operates the Ashton Mine, located 14kms west of Singleton in the Hunter Valley region of NSW. Ashton is predominantly owned by Yancoal Australia Limited which has mining operations and development projects in NSW and QLD. The Ashton operation currently incorporates an underground mine, an open cut mine, a CHPP and a rail siding. The 3.0mtpa underground mine utilises modern longwall equipment and is scheduled to continue until 2025.

Ashton Underground mine currently has vacancies for Mining, Mechanical and Electrical Technicians to directly contribute to the safety and operational functions of the mine.

Applicants who have **previous underground mining experience**, together with knowledge in the service, repair and/or operation of Joy Mining Machinery, DBT/Bucyrus & Eichhoff longwall equipment, Juganaut LHD's and conveyor belt systems will be well regarded. The Mechanical and Electrical Technicians will report to the Crew Deputy and shift Engineer and the Mining Technicians will report to the Crew Deputy.

Successful applicants will be assigned to either a rotating Monday to Friday roster or a Weekend Friday to Sunday roster.

To be part of the Ashton team, applicants must have a commitment to working safely, be **self-starters, pro-active, results orientated**, positive outlook, flexible and a focus on maintaining the high standards in place at the mine.

Applications will be received until the 16th of December 2011.
